Test Cases and Reflection

Course code and name: ISYS3416/3432 Software Engineering Fundamentals for IT

Length: not more than 5 pages

Type: Written Report (with individual task)

Feedback mode: Written feedback via Canvas

Late work:

If you require an Extension of Submittable Work (assignments, reports project work, etc.) for 5 calendar days or less (from the original due date) and have valid reasons, you must complete and lodge an Application for an Extension of Submittable Work (5 Calendar Days or less) form and lodge it with the Senior Educator/ Program Manager. The application must be lodged no later than one working day before the official due date. You will be notified within no more than 2 working days of the date of lodgment as to whether the extension has been granted. If you seek an Extension of Submittable Work for more than 5 calendar days (from the original due date), you must lodge an Application for Special Consideration form under the provisions of the Special Consideration Policy, preferably before, but no later than 2 working days after the official due date. A submittable Work (assignments, projects, lab reports, etc.) that is submitted late without approval of an extension will not be accepted or marked.

Penalties for Late Submission: A penalty of 10% per day will apply to late assignments up to a maximum of five days (weekends count for two days, not one). Note that for assignments up to five days late due to illness, a medical certificate may be presented to your teacher and a late penalty will not apply.

Learning Objectives Assessed

- CLO2: Evaluate requirements for a software system
- CLO3: Apply the process of analysis and design using the object-oriented approach
- CLO7: Design and carry out tests using various testing techniques and tools

Ready for Life and Work

The following skills will be developed upon completing this course, such as:

- Understand the purpose of test cases (unit testing) and criteria for good test cases (clear, complete, and traceable to requirements).
- To demonstrate understanding of the key points, insights, and perspectives shared by the guest lecturer.

Assessment Details

Based on the project topic assigned to you from Assessments 1 and 2, Assessment 3 requires you to create test cases and the reflection for the guest lecture. Here are the requirements:

1. **Test Cases**

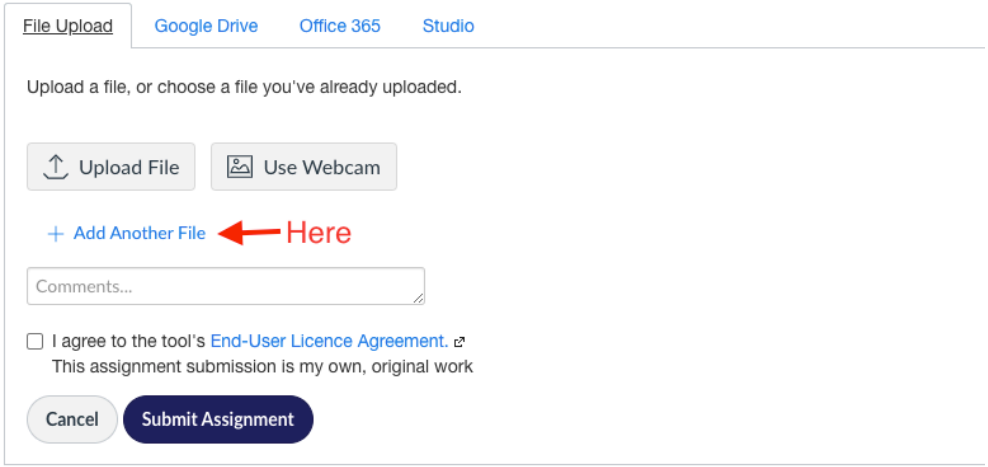

< *Write structured test cases with clear input, expected output, and conditions to ensure that all requirements are covered. Select* ***three (3) major functions*** *of your project and write the test cases for each function.* ***Ensure that you capture all the scenarios*** *and include two sets of test data (valid and invalid) for each test case. Note: Make sure that you do not have the same use case (function) as your teammates.>*

2. **Reflection from the guest lecturer (individual work)**

<Each team member is required to write a reflection on the guest lecturer. Summarize the main ideas and arguments presented by the guest lecturer. The reflection includes an introduction, what you learned (your key takeaways), your overall impressions, and a conclusion. Include your name in your reflection ***and limit it to one page****.>*

Submission Instruction

- Submit the **Group Report** to Turnitin together with the drawing **files** (***don't zip all files***). **Only one team member needs to submit this.**
  - Put all diagram drawing files (click the "**Add Another File**" option). If you use StarUML, please submit the *.mdj file. If you use Lucidchart, since it is online, it is fine to just submit the PDF/image version.
- Submit your **individual reflection and peer evaluation**

  - Name convention: *Names of* the *report files must follow the format "GroupNo_MaterialType". For example, Group8_FinalReport.docx, Group8_Diagrams.*

Support Resources

This assessment requires that you meet RMIT's expectations for academic integrity. More information and advice on how to avoid plagiarism are available in the Getting Started module.

- Open **the academic integrity page**.

Additional library and learning resources are available to help with the assessment in this course.

- Link to **Assignment Support**.
