RMIT UNIVERSITY

Outline

1. Question 1
2. Question 2
3. Question 3
4. Question 4

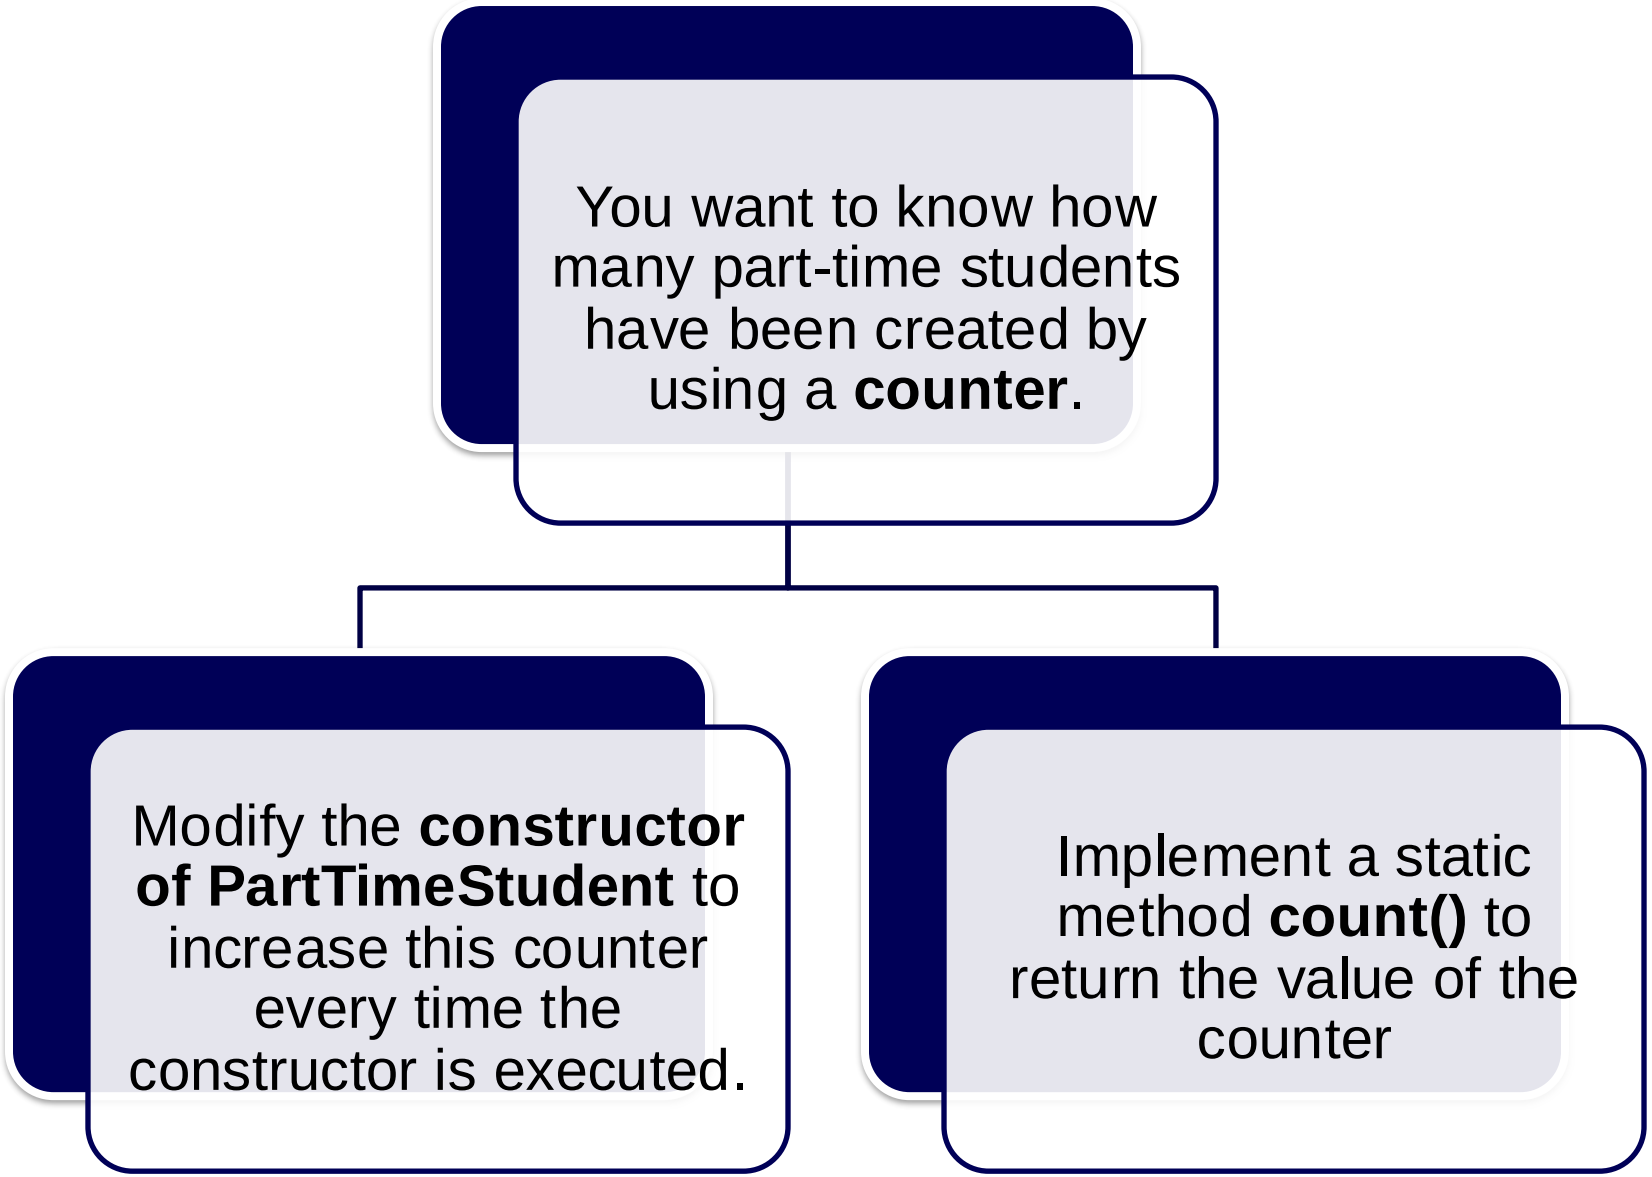

ation: Trusted

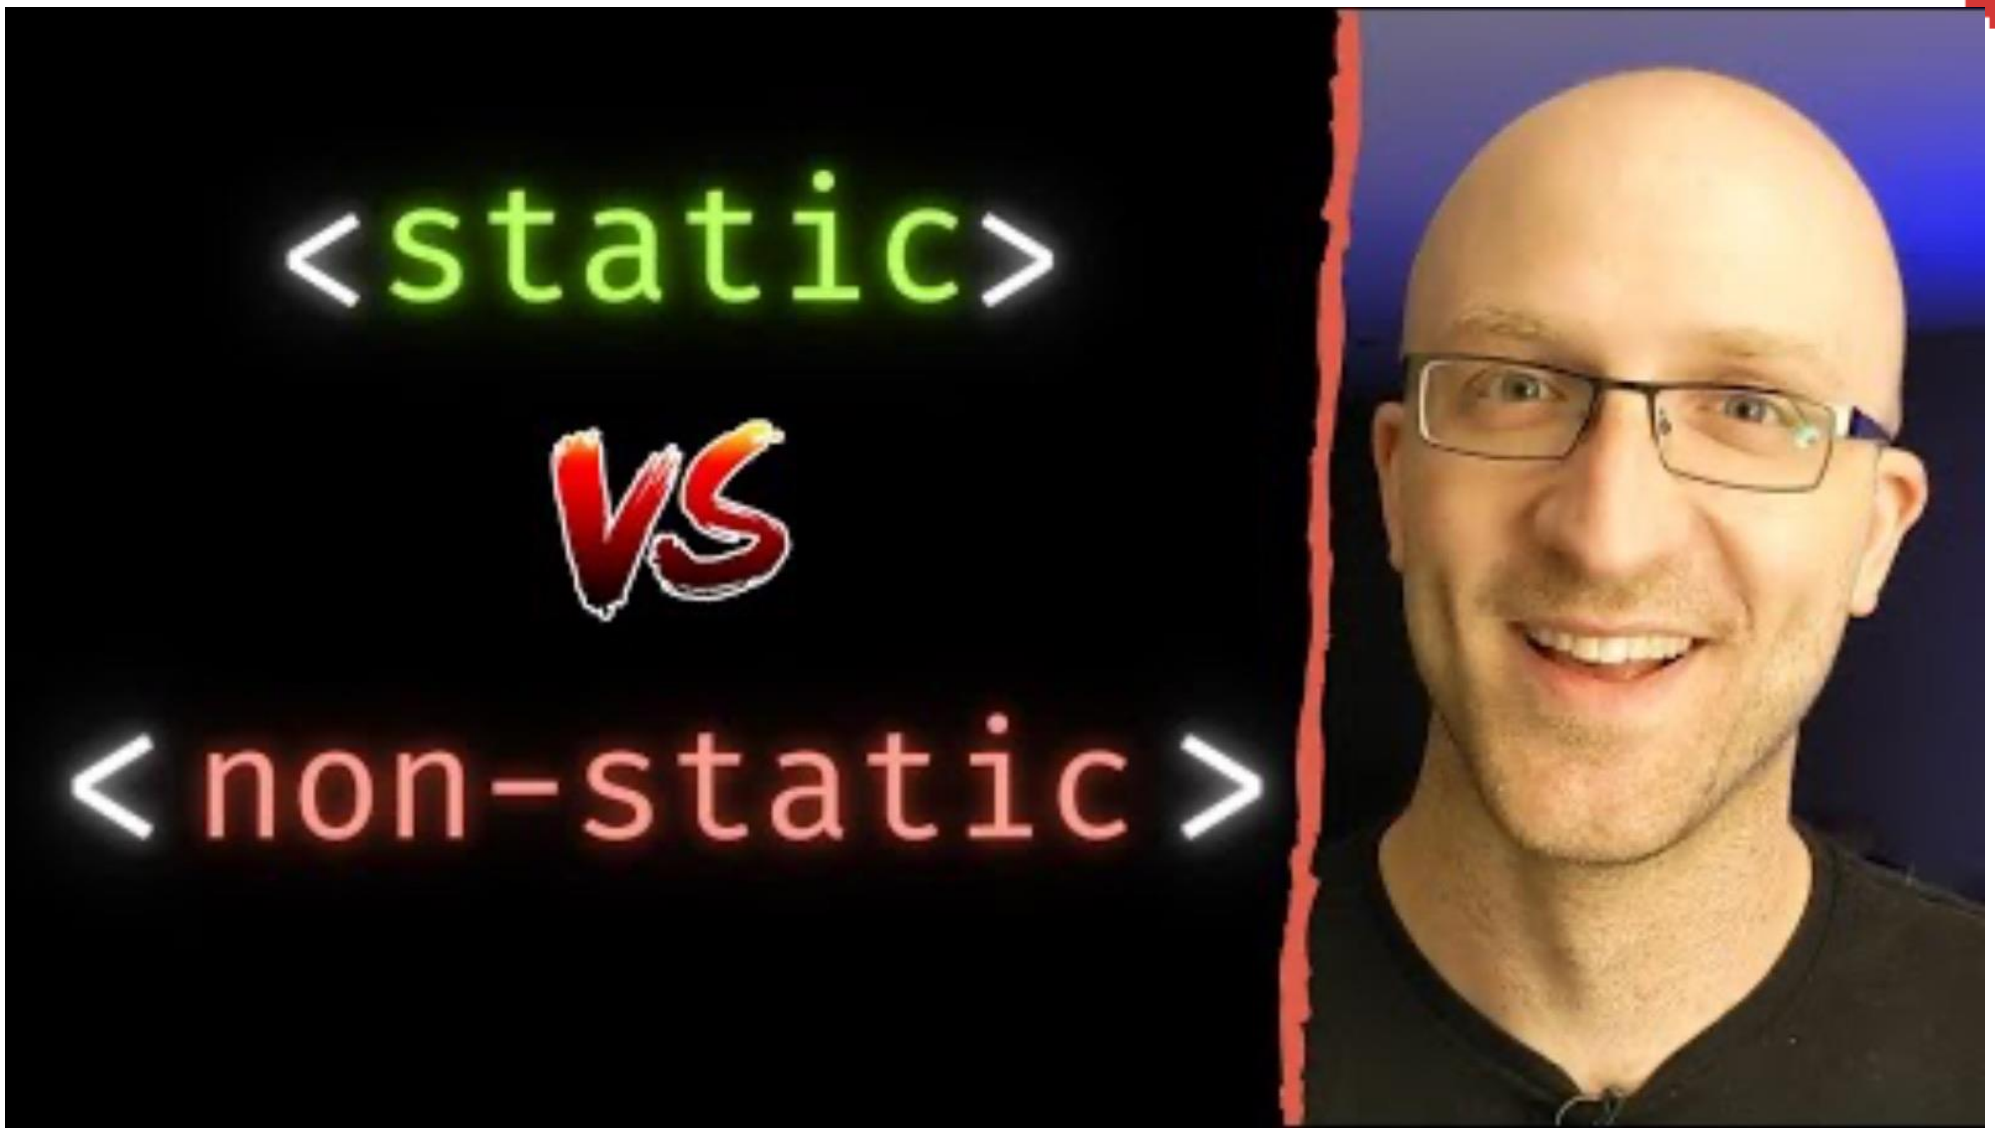

Question 1 – Use UML for Development

Use the provided solution on Canvas as a starting point and **implement** the system we designed last week.

Question 2 – Static method and variable

Question 2 – Static variable example

https://www.youtube.com/watch?v=-Y67pdWHr9Y

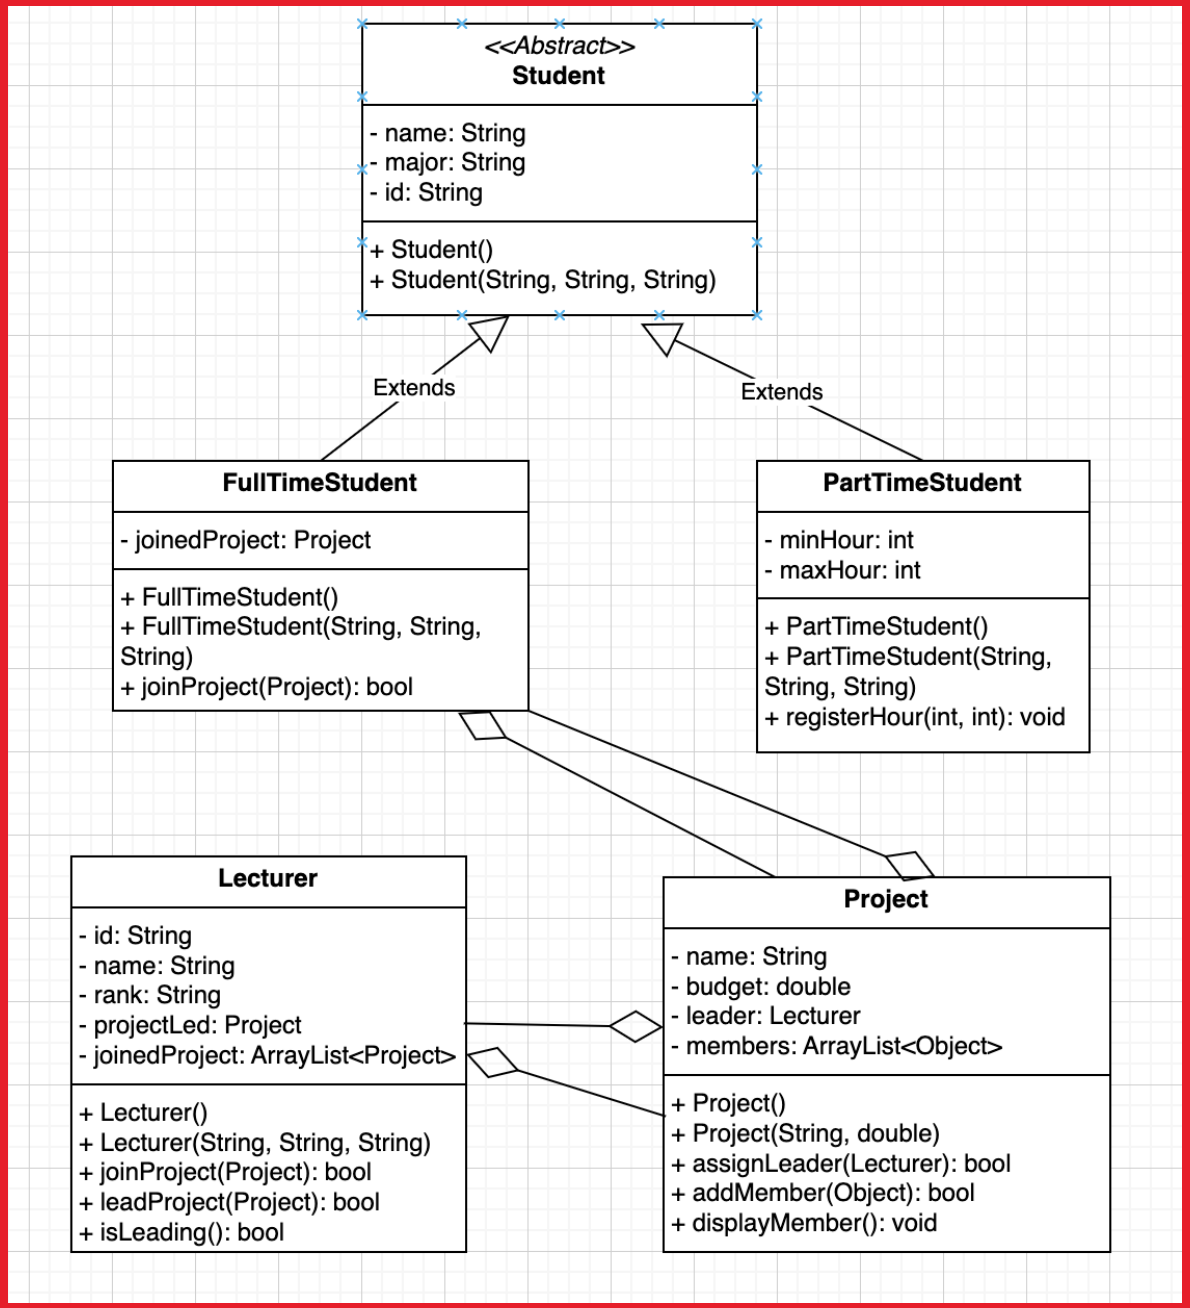

Question 3 – Implement SchoolSystem class

Implement a class **SchoolSystem** to manage the objects in our system. This class should contain:

- a list of students,
- a list of lecturers,
- a list of projects, and
- a few methods to support adding the objects to the list.

ation: Trusted

Question 4 – Preration Question

A project can contain both lecturers and full-time students as its members. Two options for Project:

- **Option 1**: maintain two separate arrays, one for each type of member.
- **Option 2**: maintain just an array of Object.

What are the disavantages of those options?

Question 4 – Using Interface

- Create an interface **Researcher** and make both FullTimeStudent and Lecturer implement this interface.
- For research profile, all project members must have two methods **setProfile**(String) and **getProfile**(). Provide those methods for FullTimeStudent and Lecturer.
